

## High Visibility Sticky Mat Frames

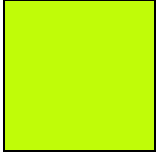

High Visibility Sticky Mat Frames come in an eye-catching, safety yellow color thanks to its light-refracting technology, which helps call attention to these low profile, rigid PVC clean room sticky mats frames. The non-skid, sticky mat frame's underside holds the frame firmly in place on virtually any type of floor while still allowing the product to be moved to other locations. Additional clear sticky mats are also available.

- Bright, glowing edges attract attention to these sticky mat frames for increased safety and to act as a reminder to users to walk across the sticky mats to remove dirt, debris and other contaminants from their shoes.
- These safety yellow frames can be used when only a couple of individual sticky mat sheets are needed at a specific location (since the frame is easily transportable).
- High Visibility Sticky Mat Frames have a high-traction, non-skid backing to keep them firmly in place regardless of the type of floor the frame is placed on.
- Clear stick mat replacement pads are available to trap dust and dirt. (The sticky mats remove impurities from shoes before they can contaminate an area. Once the top layer is dirty, simply peel off and dispose).
- High Visibility Sticky Mat Frames are perfect for laboratory, hospital and construction environments.
